Oakland Community College
CREST Survey
Emergency Response Providers Survey
2007

Executive Summary

- From an original list of 217 potential providers of emergency response training, 20 groups responded to the survey. However, 16 addresses were not deliverable (response rate= 9.95%).
- Questions regarding the courses and programs offered or planned (both online and on site) and fees were asked. In addition, respondents were asked to assess funding sources, costs, room & board for programs and courses, marketing, branding, and partnerships.
- With only 20 responses, generalization to the population is not feasible. As an alternative, tables indicating the responses from each program are provided. Any blank information indicates that the respondent did not answer that particular item.
