SUBJECT: FERPA—Directory Information

DATE: November 2, 1998

Thank you for the quick response to my inquiry regarding Wayne State's decisions to provide directory information in compliance with FERPA requirements.

You requested more details about the student information the library provides in the shared DALNET patron database. Anaclare Evans compiled a list of data elements currently used in our shared NOTIS system as well as a list we are developing for our new Horizon system. As Anaclare points out, in Horizon, some data will be kept locally in the Wayne State files and will not be shared with other DALNET libraries.

Please let me know if this needs further clarification. Thank you again for your help.
