DRAFT Version 1.0

DALNET Circulation Standards Committee

Charge

The DALNET Circulation Standards Committee is responsible for the shared elements of the circulation module, including:

- developing and recommending standards for shared databases as they relate to circulation;

- determining specifications and priorities for the circulation module's statistical and management reports; and

- recommending policies for implementing automated circulation in a consortium environment.

Committee recommendations will be submitted for Project Managers review and Board approval. After Board approval, the Committee is responsible for procedures to implement and disseminate the standards and policies, as needed.
